## One of our article featured on the Translational and clinical research Nature Communications Editors? Highlights webpage

Feb 2, 2021

The screenshot shows the Nature Communications website interface. At the top, there are navigation links for "nature communications", "View All Nature Research Journals", "Search", and "Login". Below this, there are links for "Explore Content", "Journal Information", "Publish With Us", "Sign Up For Alerts", and "RSS Feed". The main content area features a "FOCUS | 26 JANUARY 2021" section titled "Translational and clinical research". A brief description follows: "Translational research describes the process of converting basic scientific findings into novel treatments and diagnostics aimed to address unmet clinical needs. Here, we showcase a plethora of diverse studies, ranging from the investigation of the molecular mechanisms... show more". To the right of the text is an anatomical illustration of a human torso showing internal organs. Below the main text, there are links for "Focus home" and "Editors' profiles". A "Featured articles" section is visible, with the first article titled "Exhausted T cell signature predicts immunotherapy response in ER-positive breast cancer". The article is dated "17 JUL 2020" and is available under "OPEN ACCESS". A short summary of the article is provided, along with a "show more" link and the authors' names: "Manuela Terranova-Barberis, Nela Pavlovskis — Pamela N. Munster".

The paper "Exhausted T cell signature predicts immunotherapy response in ER-positive breast cancer [1]" has been chosen to be displayed on the Nature Communications "Translational and clinical research Editors? Highlights" webpage. All the team is really honored !
